LARGE COMMERCIAL, JAN - DEC 2010

Washington Gas Energy Services

A Washington Gas Affiliated Company

In 2010, you purchased renewable energy certificates (RECs), also known as renewable energy credits. For every unit of renewable electricity generated, an equivalent amount of RECs were produced. Your purchase of RECs supported renewable electricity generation, which helped reduce conventional electricity generation.

The product you purchased is sold in blocks of 1000 kilowatt-hours (kWh). Each 1000 kWh is equal to one REC. The product you purchased was made up of the following renewable resources:

New ¹ Renewables		Generation Location
-Biomass	0%	
-Geothermal	0%	
-Eligible hydroelectric	0%	
-Solar	0%	
-Wind	100%	TX: 89.5%; IA:10.1%; PA: 0.4%
TOTAL	100%	TX: 89.5%; IA:10.1%; PA: 0.4%

1. New Renewables come from generation facilities that first began commercial operation on or after January 1, 1997.

For comparison, the average (2002-2006) mix of energy sources supplying the US includes: Coal (49%), Nuclear (20%), Oil (3%), Natural Gas (18%), Large Hydroelectric (7%), Other Fossil (1%), and Renewables (2%). (from U.S. Department of Energy/Energy Information Administration)

For further information or questions, please contact Washington Gas Energy Services (WGES) by email at wgeslqc@wges.com or 703-793-7348.

Energy CERTIFIED

Green-e[®] Energy certifies that Large Commercial CleanStepsSM Windpower meets the minimum environmental and consumer protection standards established by the non-profit Center for Resource Solutions.
